

# DIGITAL RECEPTIONIST

## REDUCE STAFF WORKLOAD WITH AUTOMATION

Digitise the visitor arrival process with a Digital Receptionist and reduce the staff workload.

### Overview

Eliminate the need for an Office Receptionist to greet guests and digitise the customer arrival process with a Digital Receptionist Messaging System.

### How it works

Visitors are prompted with a digital greeting and asked to select the contact they wish to see. A text message and/or an email is triggered to the appropriate person to notify them that their guest has arrived in reception. Additional prompts can be added to include a sign in process like Workplace Health and Safety and other business requirements.

### Features & Benefits

- System includes tablet device and tablet holder
- Programmable with unlimited contacts
- Choice of text message, email notification or both
- Custom branded with logo and greeting message

### Customer Testimonial

*"AAC Solutions provided us with the technical guidance we needed when it came time to digitising our reception area. They provided us with a custom branded solution which eliminated the need for a human resource, reducing overhead costs. We are often asked about our digital receptionist and are always happy to discuss how it's improved our operations."*
