FACIAL RECOGNITION

IMPROVE PATRON SAFETY IN PUBS, CLUBS & CASINOS

AAC SOLUTIONS

Overview

Intelligent video analytics and facial recognition software provides a simple, accurate solution for complying with Responsible Gaming Regulation and helping to manage patrons in licensed venues.

The Harm Minimisation module allows patrons to exclude themselves from a licenced venue or through a centralised service. Real-Time monitoring and alerts enable staff to react as soon as an actionable entry or other incident occurs.

Benefits

- PulseLive Integration, Messaging & Reporting Platform integrates with Facial Recognition to allow alerts to be sent to the appropriate staff
- Enhanced patron and staff safety and well being
- Fast and accurate Facial Recognition
- Integration with Gaming Loyalty Systems
- Reduced business risk
- Contact tracing, incident investigation
- Real-time alerts and notifications to various communication devices including traditional pagers, Smart Pagers and mobile phones.
- Flexible reporting and Business Intelligence data
